

# REDEQUI

## equestrian therapies network

A network of pedagogic farms  
based on equestrian therapies.

# What is a pedagogic farm?

- ❖ Alimentary goods both of vegetal and animal origin are produced in a strictly ecologic way.
- ❖ Agriculture, breeding, and alimentary production are taught as professional formation schooling programs.
- ❖ Application of new technology, especially clean renewable energy, recycling, and multimedia communication.

# What are the equestrian therapies?

Hippo therapy.

Horses assisted psychotherapy.

Educative and integration activities.

Social equestrian therapy.

Adapted sports and leisure.

Integral management.

# What is the result of their synergic combination?

High quality ecologic alimentary goods production.

Excellence in health care of the disable.

Sports and leisure center connected to the schools.

Self administration – autonomy of all participants.

# RED Network

NON PROFIT organizations, directed by social educators, will have to administrate each farm, aiming to generate a pedagogic environment, to grant the respect of all living beings; security; and health benefits for all participants;

# RED Network

Through Internet the network will allow a high  
MOBILITY of personnel, students, patients, and  
technical information from 1<sup>st</sup> to 3<sup>rd</sup> world.

# RED Network

The 1<sup>st</sup> world will get feedback mobility from the 3<sup>rd</sup> and will contribute to improve the balance between rich and poor countries and people.

# RED Network

Each farm will have to cooperate with local authorities.

REDEQUI will provide international support in order to preserve and keep following our ethical principles.

# Thanks
